⚠ Caution ⚠

1. The LEDpods emit UV light. Never look directly at these lights
2. *LunaGLO™* tape and LEDpods may not fit on every bike due to rim profile and bike design/components
3. NEVER apply *LunaGLO™* rim tape to the braking surface of the rim. The *LunaGLO™* rim tape should NEVER contact the brake pad.

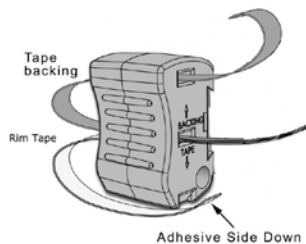

Application of *LunaGLO™* rim tape using Tape Applicator Tool

[NOTE: *LunaGLO™* tape can be applied freehand if necessary]

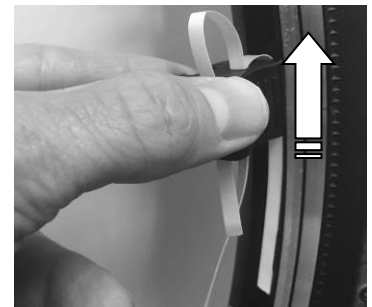

1 Clean and dry rim surface

2 Peel liner off tape and feed through applicator tool

3 Apply to rim slowly and evenly – overlap at end

Tips

1. Tape should **not** be applied in cold temperatures or to cold surface.
2. If you do not have a bike workstand, flip bike upside down when applying tape.
3. Tape can be applied by hand without applicator tool if rim shape is not compatible with tool

Strap On the *LunaGLO™* LEDpods

1 Strap On LEDpods on front forks and on seat stay or chain stay

Tips

1. Strap rear LEDpod on rear seat stay when possible
2. Never position LEDpods where they will contact the chain, tire or rim
3. Brakes, mounting bosses, chains, suspension forks and other components can interfere with proper positioning of LEDpods
4. Light should be targeted on *LunaGLO™* tape on the rim
5. For small diameter forks, use belt loop holes – trim excess strap with scissors if necessary

2 Examples of Front Placement

3 Examples of Rear Placement

Operation of LEDpods

- Press once for constant light, twice for rapid flashing, three times for slow flashing, four times for off
- For brightest glow use constant mode, for longest battery life use slow flashing (least bright)
- Each LEDpod uses two CR2032 lithium coin cell batteries. Replace when necessary
- Battery replacement: Remove silicone cover. Remove top. Remove & replace batteries

MAINTENANCE

Always keep the *LunaGLO™* rim tape free from dirt buildup as it will impact glow brightness. Clean the tape with mild soap and water. Never use anything abrasive to clean the tape. Use harsher cleaners at your own risk as the chemical may impact adhesion of the tape. Clean LEDpod lenses as necessary.

LIMITED WARRANTY

Lunasee warrants its products against defects in materials and workmanship under normal use for 90 days for the LEDpods and for 1 year on the *LunaGLO™* rim tape from the date of purchase by the original end-user purchaser ("Warranty Period"). Since we cannot control application, Lunasee provides no warranty on the adhesive component of the *LunaGLO™* tape. See full warranty for more information on our limited warranty.

DISCLAIMERS AND NOTICES

Always ride safely and responsibly. While Lunasee believes the use of LunaGLO™ lights will enhance a cyclist's visibility to other motorists, Lunasee does not warrant the safety of those that use its product. Please ride safely, wear a helmet and other protective and reflective apparel at all times.

Installation and use of this system may violate certain federal, state and local laws, rules and ordinances as well as other laws when used on vehicles operated on public highways. It is the sole and exclusive responsibility of the user to determine the suitability of the product for his or her use, and the user shall assume all legal, personal injury risk, and liability and all other obligations, duties and risks associated therewith.
